EXPERIENCE

Engineering Intern (Co-op)

Jun 2024 – Feb 2025

Illumio, CloudSecure

Sunnyvale, CA

- Integrated multi-cloud networking resources (VPN Gateways) providing comprehensive visibility in the application.
- Developed efficient relationship mapping between AWS Lambdas and hyperplane ENIs using Neo4j graph queries.
- Led the OnCall activities, triaging and fixing critical bugs, which improved team alignment & stronger collaboration
- Spearheaded a transformation of integration testing process by applying strong written and verbal communication skills to architect a standardized framework using Terraform and Go, which increased test coverage by 60%.
- Skill-set:** Golang, Postgres, AWS, Azure, OCI, REST APIs, gRPC, Grafana, Code Review, Rust, Backend

Software Engineer

Oct 2022 – Aug 2023

WorkSpan (Angad Corp Ltd)

Bangalore, India

- Led the development of customer onboarding automation (Co-Sell), reducing setup from 3-4 days to under 10 mins
- Developed Export API to download reports & charts, increasing app engagement by 60% with 30% revenue growth.
- Quickly addressed prod issues as a recent hire, establishing strong customer relationships and leadership confidence.
- Skill-set:** Python, MongoDB, Design Patterns, SDLC, GraphQL, PostgreSQL, Problem-Solving, GCP, End-to-end

Software Engineer

Oct 2019 – Oct 2022

UnitedHealth Group

Gurgaon, India

- Enhanced scheduling app and created TWS agent service, to run jobs efficiently, improving performance by 30%
- Resolved production issues rapidly as on-call, ensuring minimal downtime and high customer satisfaction.
- Modernized legacy DataStage ETL pipeline as scalable Java microservices leveraging Kafka Streams, improving code maintainability through Sonar quality gates, comprehensive JUnit testing, and production monitoring via Splunk.
- Skill-set:** Java, Docker, Redis, Kubernetes, DevOps, Apache Kafka, Prometheus, MySQL, Oracle, Spark, Scala

PROJECTS

AES System with Multi-Scale Features | *PyTorch, BERT, Weights & Biases.*

Apr 2025 – Jun 2025

- Developed an AES system leveraging a pre-trained SBERT model, manage hyperparameters and deep neural networks to fine-tune essay tasks and extract semantic features for human-like grading. Test Accuracy - 60%.

Resource Optimization with Load Balancing | *Cloud Infrastructure, ML, CloudSim*

Feb 2025 – May 2025

- Implemented a QoS-aware Load Balancing algorithm for optimized scheduling in Cloud Computing Application, reducing Makespan and improving resource utilization by up to 78%. (*NetSTAR Lab, Prof. Bechir Hamdaoui*)

BeaverHacks 2025 - UniRide | *Python, Flask, FastAPI, Angular, Postgres*

Apr 2025 – Apr 2025

- Built and deployed a secure, full-stack carpooling platform to connect university students for verified rides via .edu with OAuth authentication. Leveraged Google Maps API for location autocomplete and route planning.

Open Source Kafka Contribution | *OSS, Kafka, JIRA, Unit Tests*

Jul 2025 – Aug 2025

- Demonstrated strong initiative by independently identifying testing gaps & implementing with TopologyTestDriver

EDUCATION

Oregon State University

Corvallis, OR, USA

Master's in Computer Science, Minor in Artificial Intelligence , GPA: 3.97/4.0

Sept 2023 – Dec 2025

- Relevant Courses:** Data Structures & Algorithms, Operating Systems, Computer Architecture, Systems & Networks Security, AI, Machine Learning, NLP with Deep Learning, Database Systems, Programming Languages
- Graduate Teaching Assistant:** Intro to Statistics, Parallel Programming, Mobile Software Development
- Extracurriculars:** Active member of Society of Women Engineers & MLH Community with volunteering in Engg events at OSU. Learnt & performed Middle Eastern Dance Showcase. and fitness events like rock climbing

TECHNICAL SKILLS

Languages: Java, Python, Go, C, C++, SQL, Javascript, Angular, Unix, PHP, NoSQL, Kotlin, Gradle, Ruby, HTML
Frameworks/Tools: SpringBoot, React, Containerization, CI/CD, Maven, Git, Linux, Agile, Frontend, Jenkins, Spring
AI/ML: PyTorch, TensorFlow, Keras, NumPy, Pandas, Scikit-learn, OpenCV, Attention Models, GPU, LLM
